SIMATS ENGINEERING
ASSESSMENT TOOL 2 : Concept Mapping

COURSE NAME: Cloud Computing and Big Data Analytics **COURSE CODE:** CSA15

COURSE OUTCOME COVERED

CO1: *Apply cloud computing technologies including hardware-software evolution, virtualization, web services, and service models to develop cloud-based solutions.* **(BL2)**

Dave's Taxonomy: Imitation (Level 1) **Total Marks: 50**
Question Count: 4

Code of Conduct

I M. Sanjay Krishna (192525421) (Name / Reg No)
certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment.

I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the student: M. Sanjay

Assessment Tasks

Concept Mapping Tasks

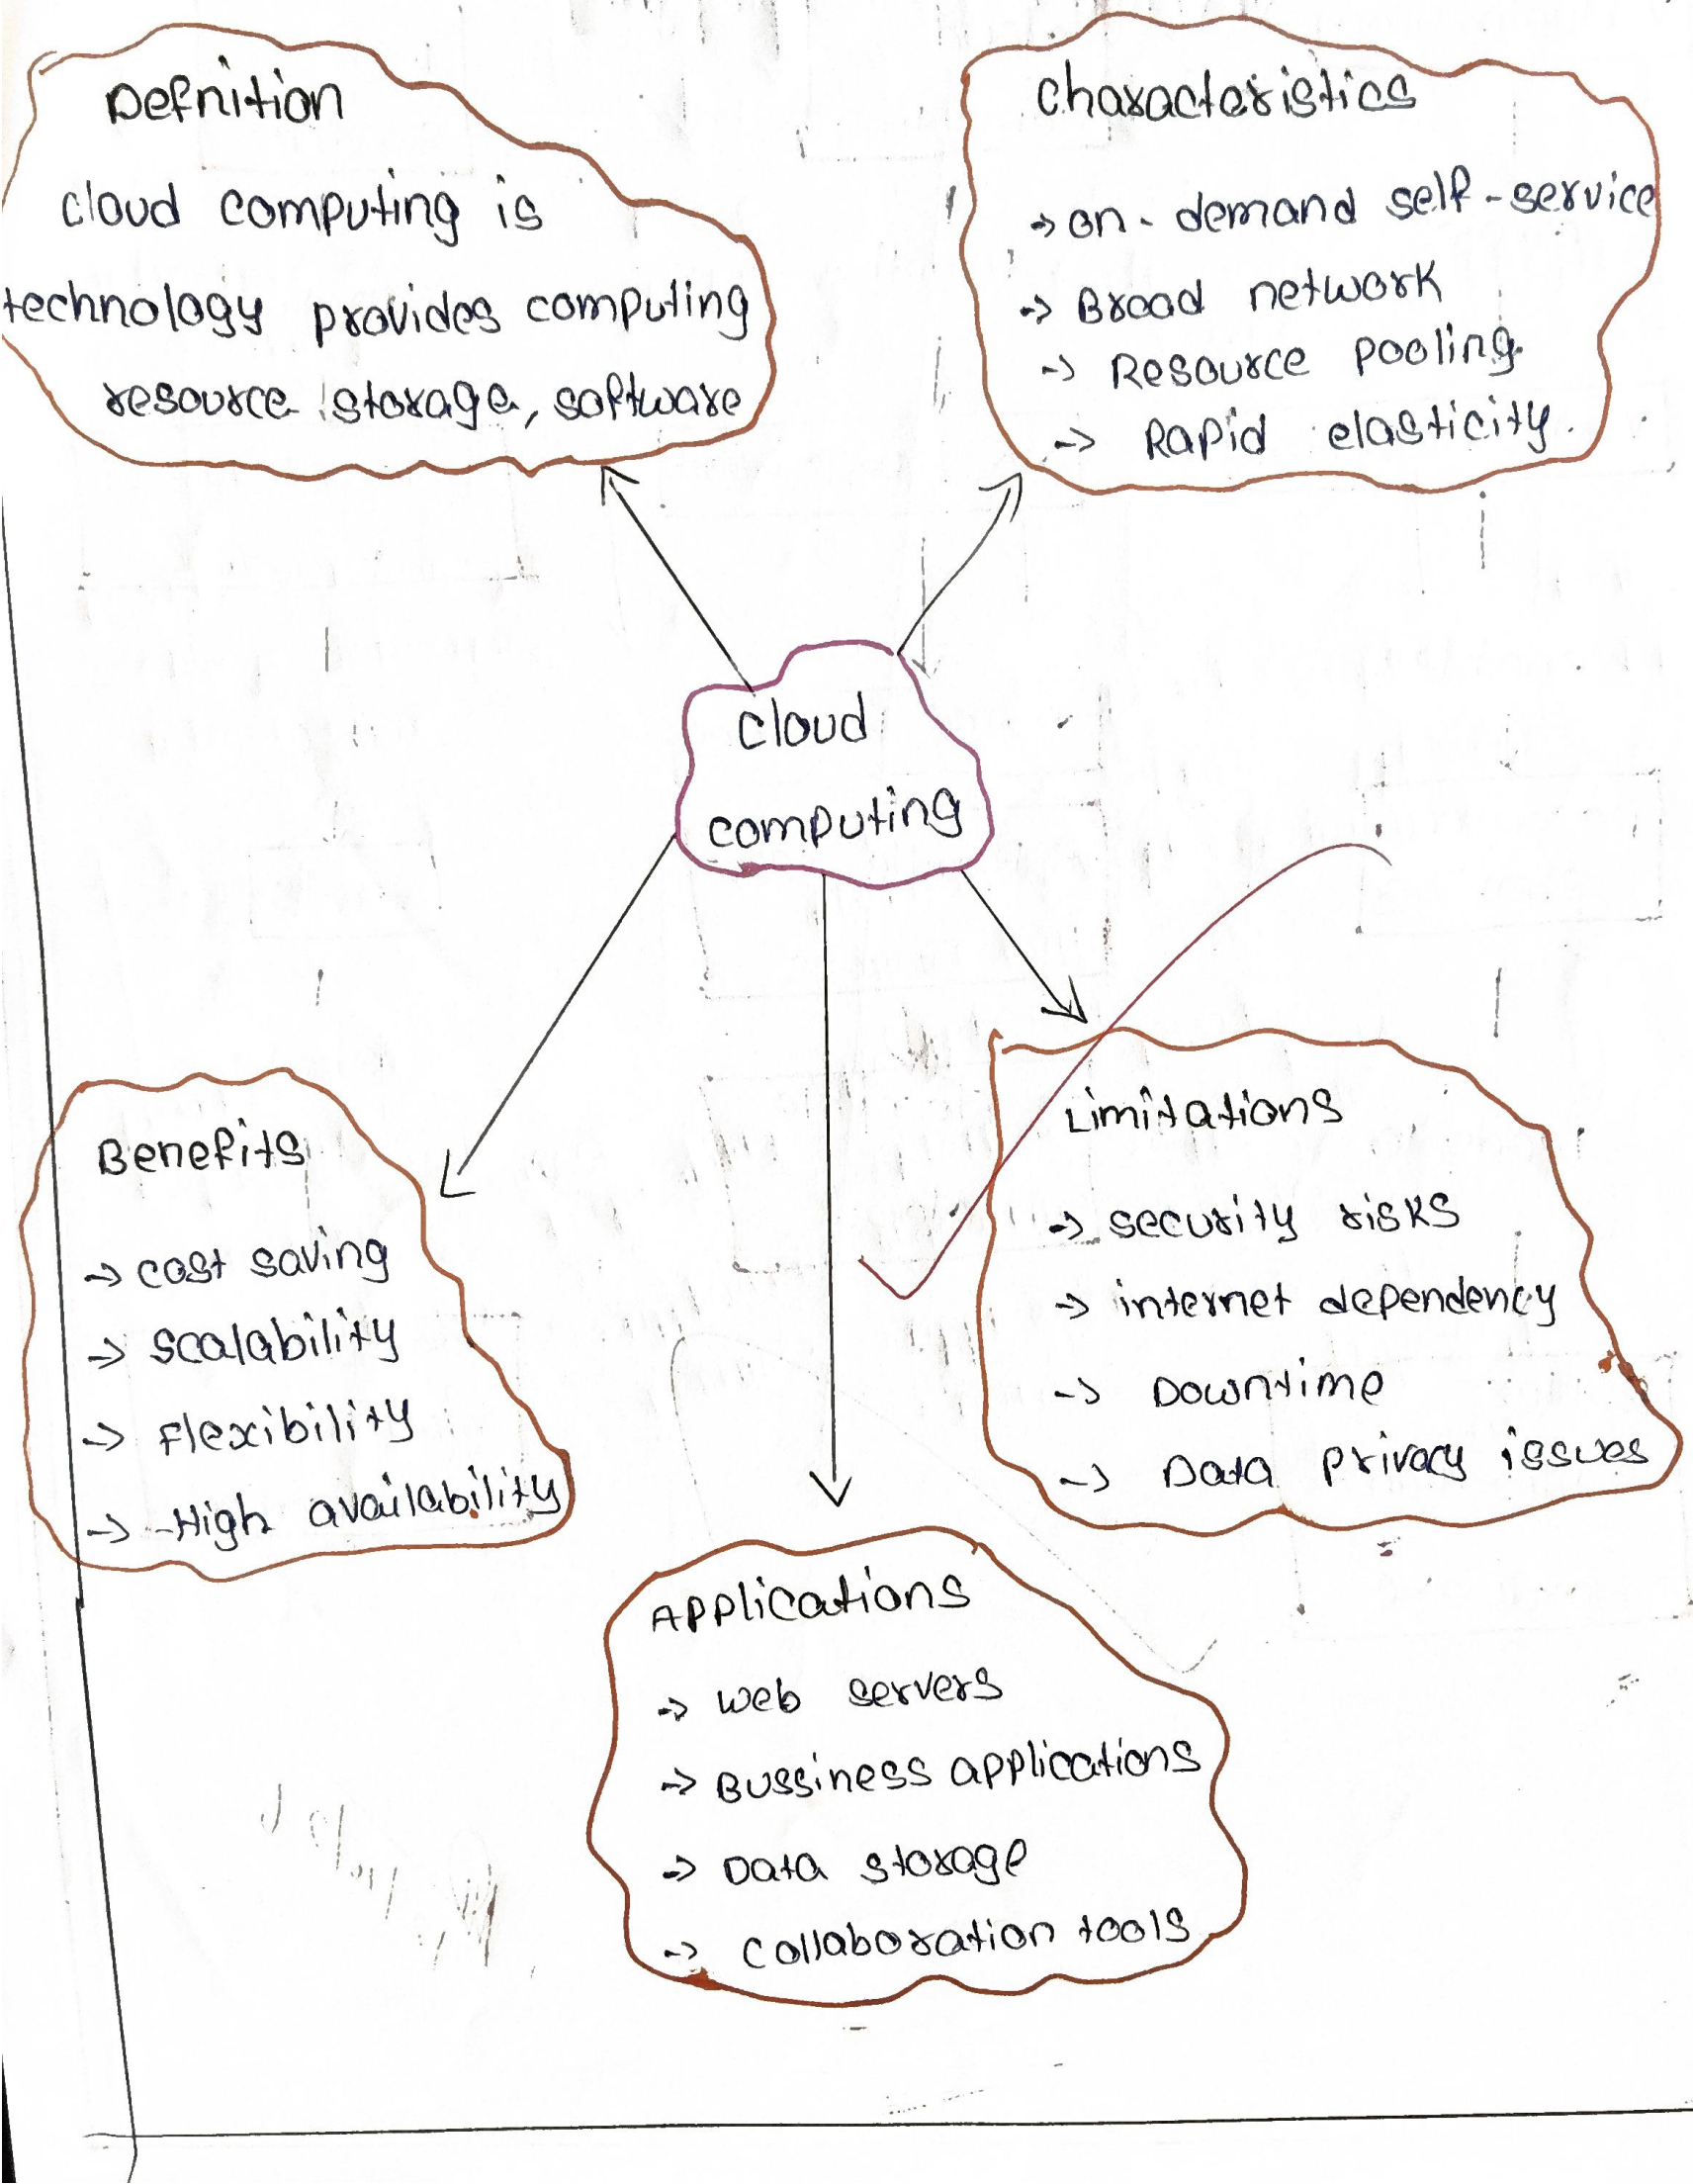

Create concept maps for the following tasks. Each map must show key nodes, link labels, and a logical hierarchy.

1. Concept Map 1: Cloud Computing Fundamentals. Include definition, characteristics, benefits, and limitations.
2. Concept Map 2: Evolution of Cloud Computing. Connect hardware evolution, internet software evolution, distributed systems, and service delivery.
3. Concept Map 3: Service Models. Map IaaS, PaaS, SaaS, and XaaS with provider responsibilities and user responsibilities.
4. Concept Map 4: Virtualization and Web Services as Enablers of Cloud. Show how these two concepts support cloud deployment and scalability.

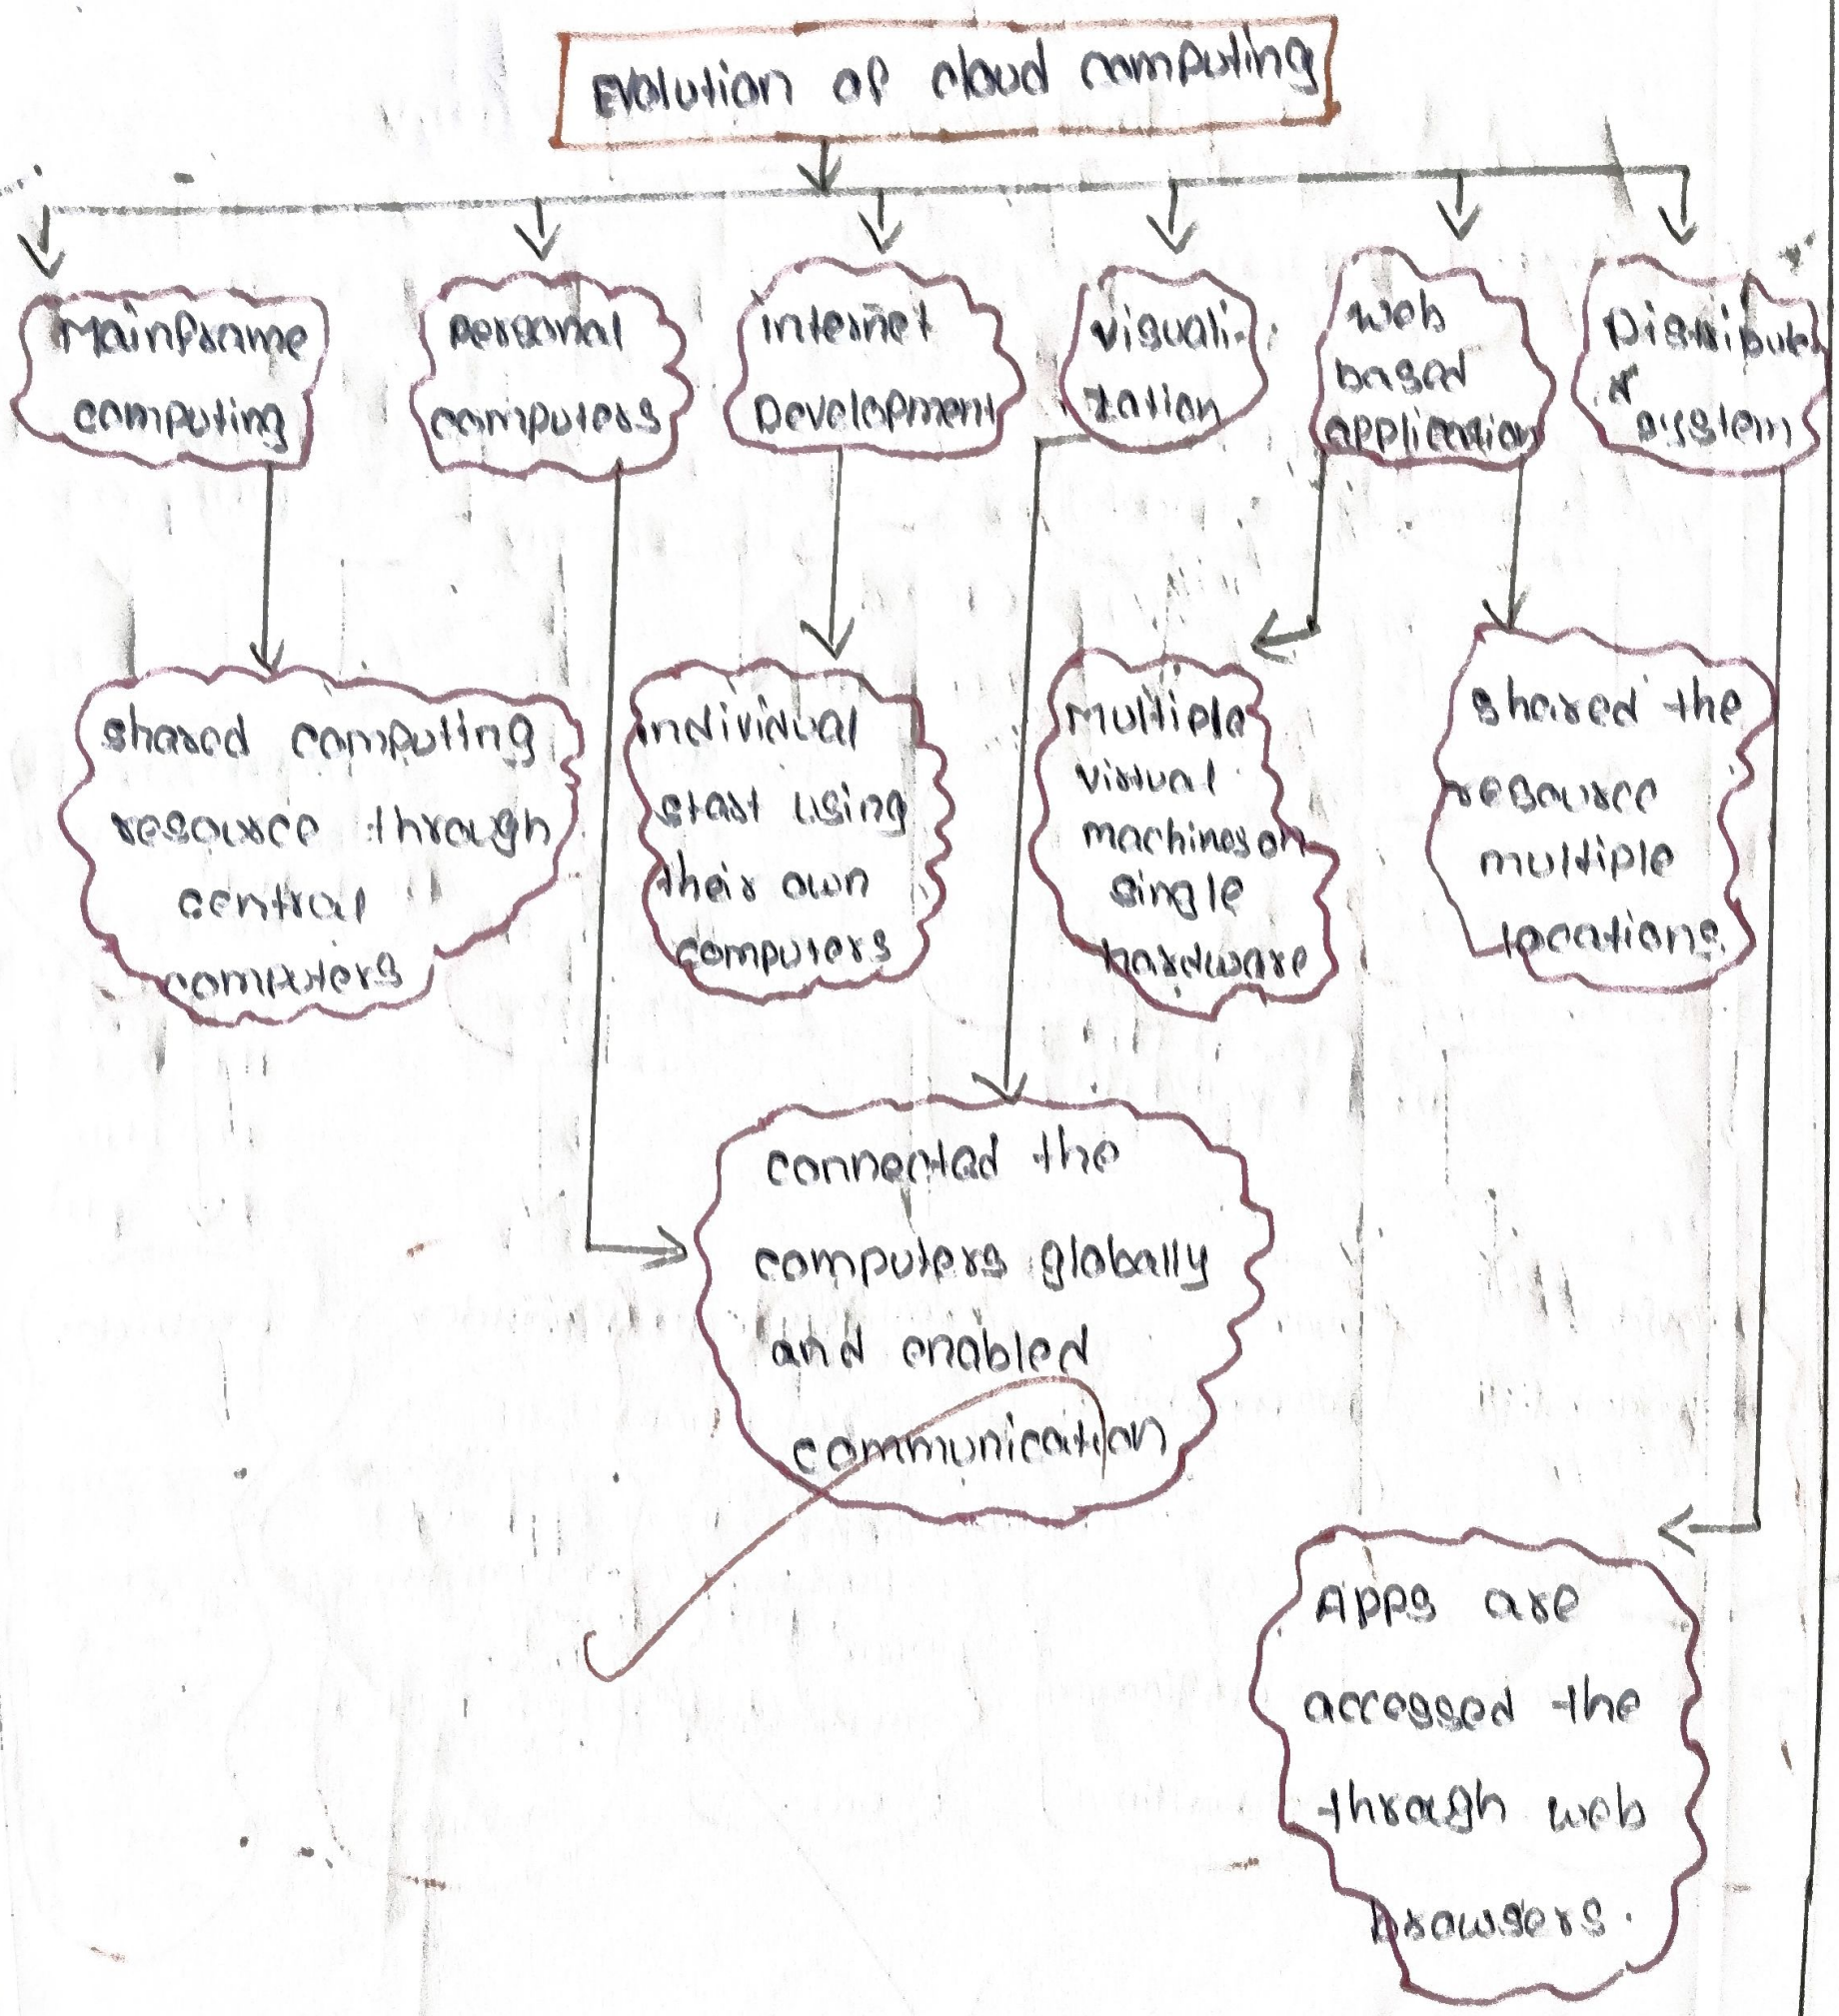

Expected concept nodes:

- *Elasticity, scalability, resource pooling, on-demand access, measured service*
- *Virtual machine, hypervisor, abstraction, API, SOAP, REST, provider, consumer*
- *Infrastructure layer, platform layer, application layer, shared responsibility*

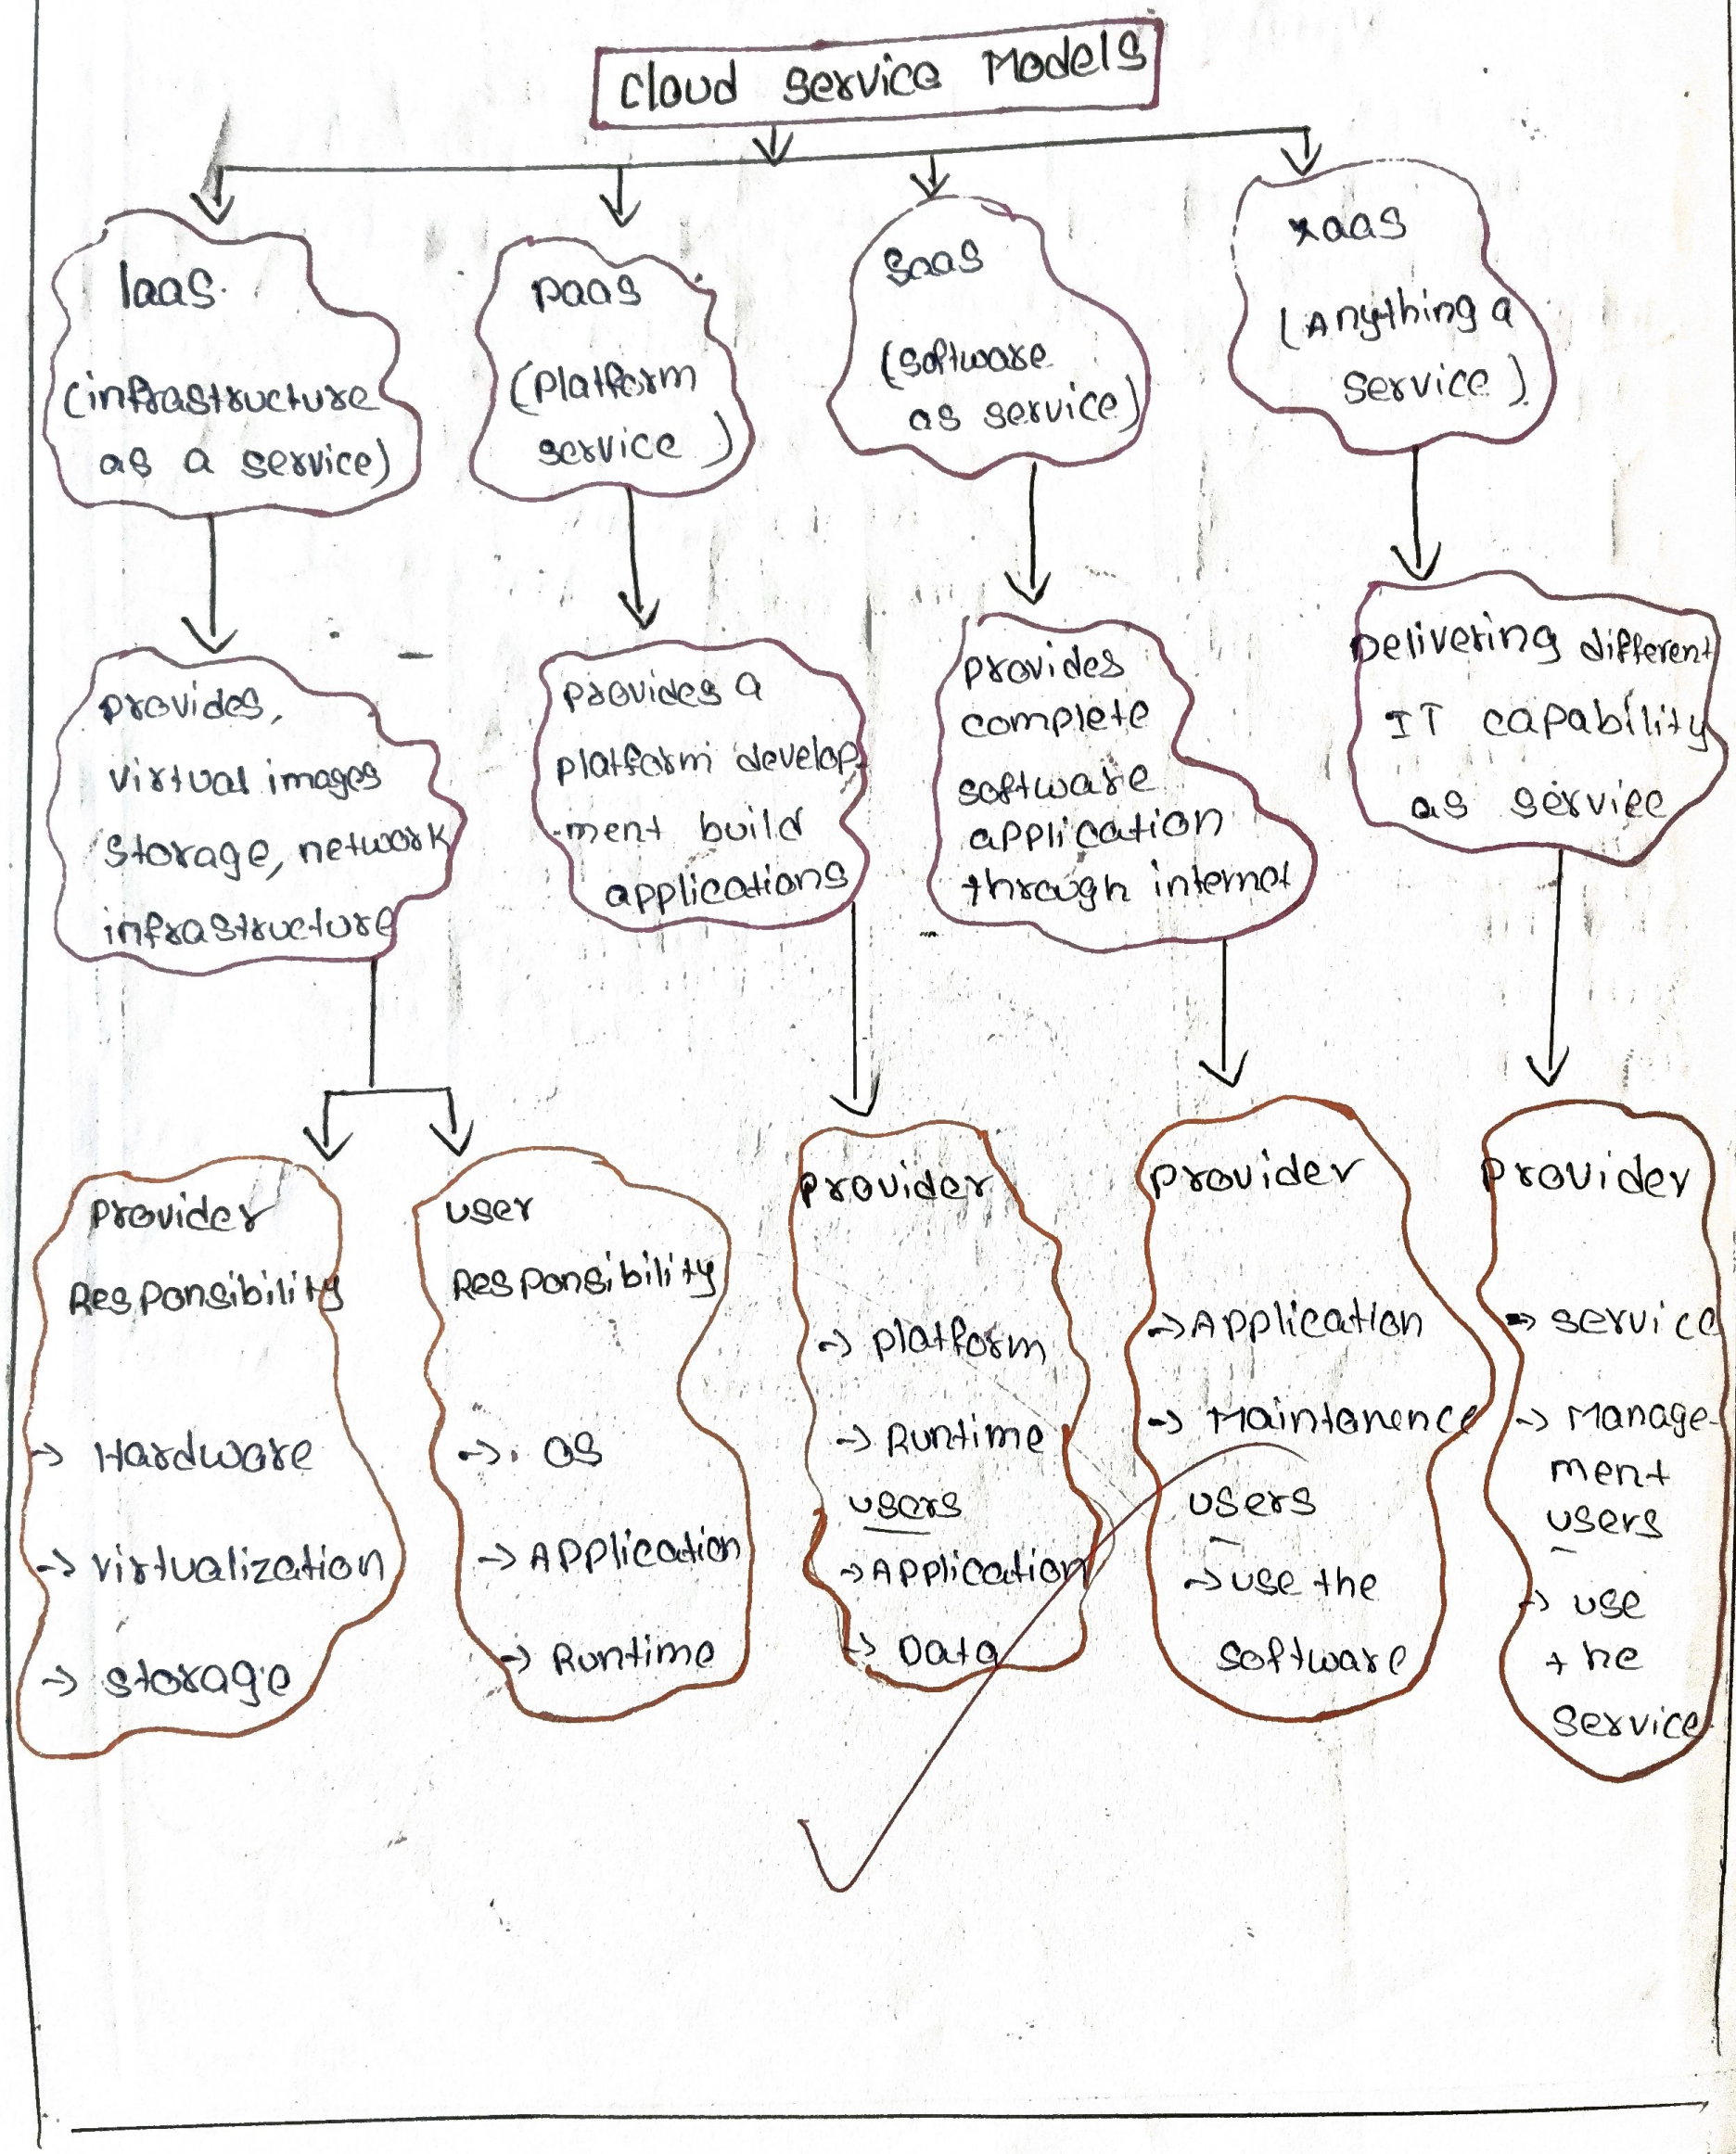

Cloud Computing Fundamentals

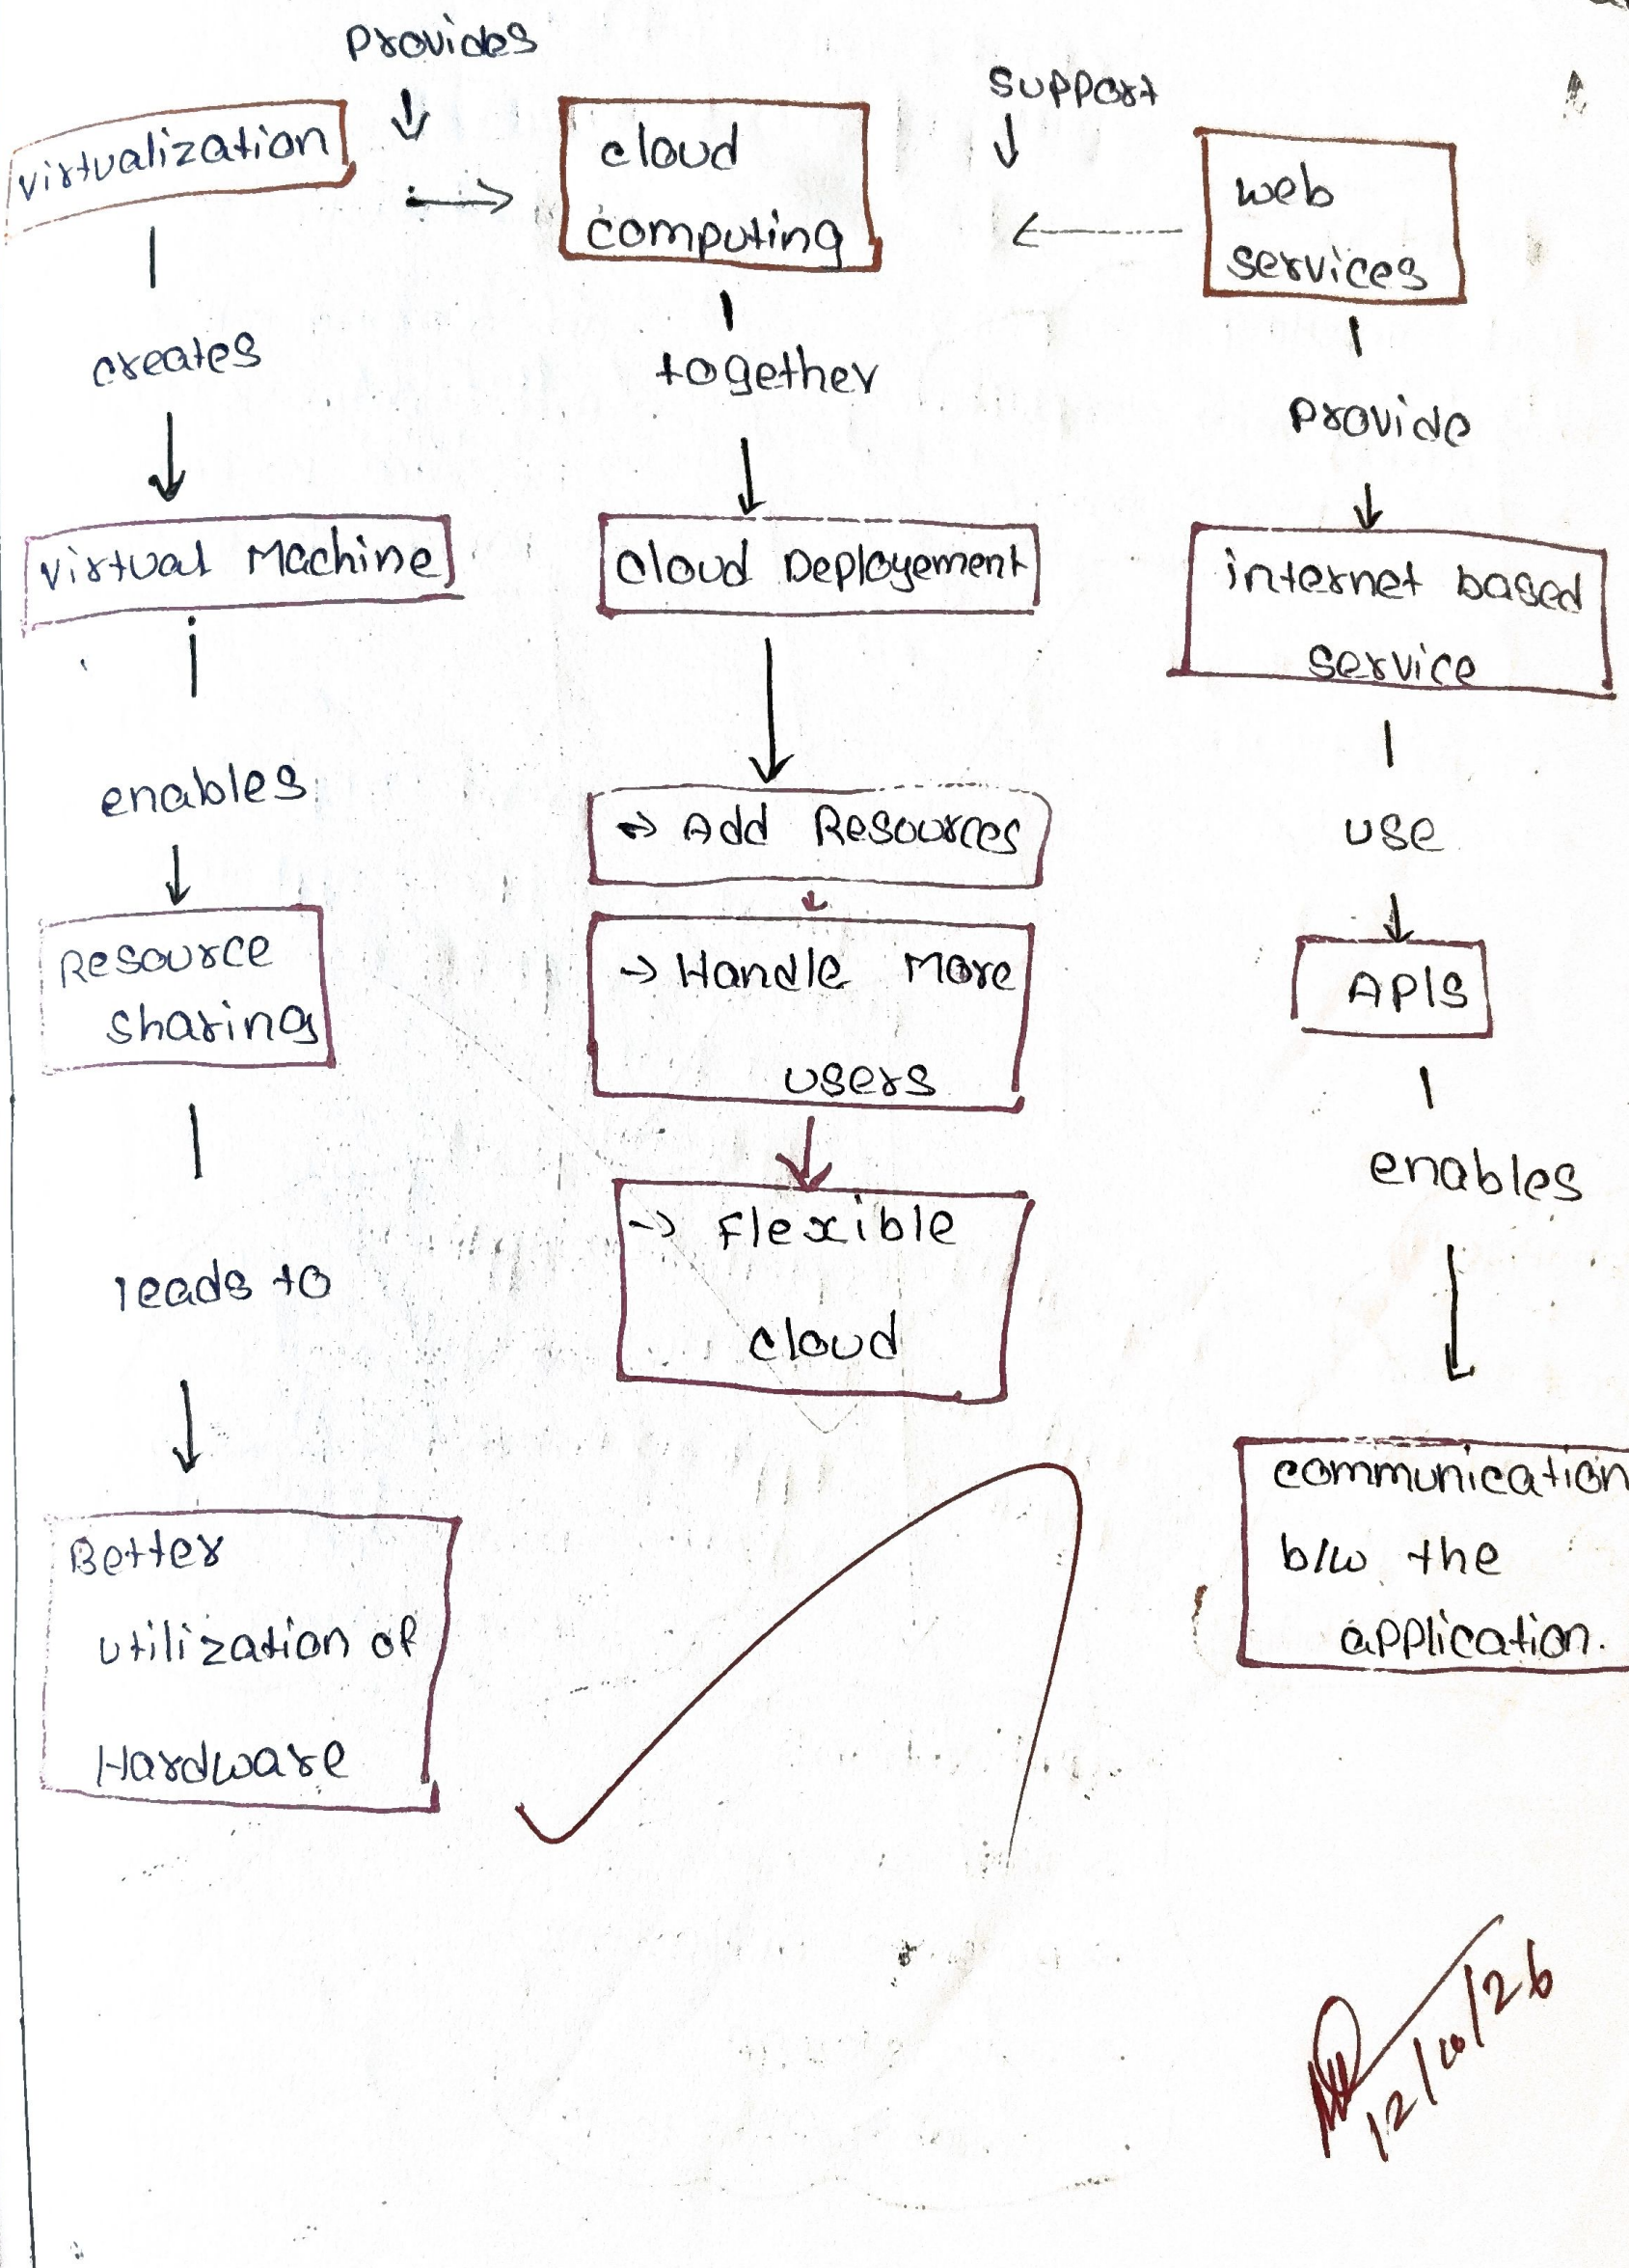

2). Evolution of cloud computing

3). Cloud service Models

4) Virtualization and web service as enables of cloud
